## OUR ENERGY FUTURE: *WHAT WE NEED TO DO*

**Tuesday, August 3, 2010 at 4.30 p.m.**

**Pherozshah Mehta Auditorium**

**University of Mumbai, Kalina Campus**

**Santa Cruz East, Mumbai 400098**

In India, we are facing a twin challenge of accessing energy at a high magnitude for realizing an appropriate quality of life for our vast population and at the same time protect the global environment against the climate change threats. Under the circumstances, nuclear and solar energy would assume far greater importance. There is however a need to quickly develop relevant technologies to enable rapid development of such clean energy sources that promise vast energy potential. It is clear that many of these solutions would need innovations based on current research and development and evolution of new science based technologies

*Dr. Anil Kakodkar (b 1943) is arguably one of India's most eminent technologists. He is the past Director, Bhabha Atomic Research Centre, Chairman, Atomic Energy Commission and is currently a Homi Bhabha Fellow at the Bhabha Atomic Research Centre, Mumbai. Among his numerous awards are Padma Shri, Padma Bhushan and Padma Vibhushan. He has over 250 scientific papers to his credit.*
