

# *Science is Fun!*

## **CENTRE FOR EXCELLENCE IN BASIC SCIENCE**

PF-AG-14, Tuesday, 6 March 2012, 15:45-18:00

Dr. Steven Spallone is currently a visiting Scientist at TIFR, Mumbai. He works in number theory and representation theory. Apart from mathematics, he has “juggling” as his hobby. Today, he will introduce mathematical modeling for juggling. You will attempt to form some of these patterns yourselves by dashing around the playground. (15:45-16:45)

Ravi Apte is an electrical engineer by profession and graduated from IIT Bombay. Today he will speak about recreational mathematics, more particularly about the work of Martin Gardner. Martin Gardner was a scientific writer, who wrote the “Mathematical Games” column in Scientific American for about 25 years. (17:00-18:00)
